I've been drawing all my life that I remember since my childhood. In 1998 I graduated with a degree of a graphical designer. Since college graduation I have been working in advertising. For 20 years I have been designing and decorating show outward appearance, retail trade areas, shopfronts and advertising photography.

My hobby is my work. Art is part of my life. I love my job. I find my inspiration by working with my students. My art reflects my feelings and my outlook on life. Creation is an air for me. I always preferred to portray flowers, birds, animals and landscapes from my travels. My works are about of my life, my dreams and reality. Each of my artworks carries a wish for something good.
